DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed 30 August 2004 has been entered and overcomes the objection to the claims and drawings.

Allowable Subject Matter

2. Claims 1-9 are allowed.
3. The following is an examiner's statement of reasons for allowance: In the remarks filed 30 August 2004, applicant argues that the applied prior art (Arai) does not teach a cross-linked molecularly doped polymer layer, but only describes various compounds as being suitable for different layers. Applicant's arguments are persuasive.
4. Thus, regarding independent claim 1, the prior art of record neither shows or suggests an organic optoelectronic device comprising, in addition to other limitations of the claim, at least one of the layers selected from the group consisting of a hole transport layer, an active layer, and an electron transport layer, and combinations thereof, comprise a cross-linked molecularly doped polymer layer.
5. The subject cross-linked molecularly doped polymer layer is provided for improving the method of manufacturing the organic optoelectronic device. Due to their dependency upon independent claim 1, claims 2-9 are also allowable. The design is new and unique to the art.
